# 0.1″ (2.54 mm) Arduino Male Pin Headers (Straight Blue 10pcs)
SKU:FIT0084-B

INTRODUCTION

This is a blue colored 40 Pin 2.54 mm（0.1"） Single Row Pin Header Strip from DFRobot.

These 0.1" header strips are commonly used as low-cost Arduino connectors. The standard spacing allows use with solderless breadboards, perforated prototyping PCBs, female headers, and our premium and pre-crimped jumper wires. The single-row header strips can easily be snapped into smaller strips to fit your application.

   We commonly use:

- Green for digital I/O
- Blue for Analog I/O
- Red for Voltage
- Black for others

SHIPPING LIST

- 40 Pin Headers - (Straight Blue) x10
